# Pylon Conduit

For Lotus Notes®

Experience the power of Lotus Notes on a mobile device, including remote access to corporate email, calendar, contacts, task lists, memos and expenses. Pylon Conduit lets you sync your handheld device to your desktop to greatly improve effectiveness and individual productivity without requiring involvement of corporate IT departments or development resources. Mobility has never been so powerful, so robust and so simple.

The Full Power of Lotus Notes on Your Mobile Device

With Pylon Conduit mobile users can improve their productivity with access to Lotus Notes email and PIM data through a device cradle and desktop computer. PIM information is accessible through native applications on Palm or Pocket PC devices. Pylon Conduit also provides access to email attachments discussion databases, journals and multiple address books and calendars.

A Seamless Extension of Lotus Notes

Pylon Conduit extends your existing Lotus Notes infrastructure, leveraging Lotus Notes security. Individuals are automatically authenticated against the Lotus Domino® directory for simple setup and administration with no demand on IT resources or special access to Domino servers necessary —it simply uses existing Access Control Lists (ACLs). Pylon Conduit provides a simple Notes database, so users can configure, filter and control access to PIM data, saving time and money, and providing a greater return on your existing Lotus Notes investment.
